A new definition for "tainted" money has come up—"taint yours, taint mine."

Missouri will celebrate her 86th anniversary Aug. 10th. She was admitted to the Union as a state Aug. 10, 1821.

If you want something neat and up to date in the line of job printing, come to the Herald office. Our work is correct and prices are right.

According to the bureau of statistics of the department of commerce and labor, the world's commerce is \$26,000,000,000. Of this appalling sum the United States contributes nearly one-fourth in the way of exports and imports.

Milwaukee, Wis., wants a man named Kosticikowineckofski for murder. A large reward is offered for his capture. We are offering a reward to the man who can pronounce the name.

Did you ever happen to consider the fact that Missouri is the greatest state in the United States? It is the only state that is really self-supporting. We can raise our own cotton and wool, our flour and feed, our fruit and vegetables; we mine our own coal and quarry our own rock; we have lead, copper, iron and silver—in fact, if Missouri were set apart from the rest of the world, she would be independent and self supporting.

Very few people, comparatively, have any adequate idea of the immense cost of producing a modern weekly newspaper, particularly in the large cities of the country. Some authentic figures on the subject have recently been made public and will doubtless occasion surprise to the uninformed. The "composition", printer's weekly pay roll, for instance on the Baltimore American is \$2,000; on the Boston Globe, \$4,200; on the Globe Democrat, \$3,000; on the New York Herald, \$4,000; and on other papers in proportion. Bills for special telegrams are another big item of expense. They run into the thousands of dollars each month and a great portion is for telegrams not used at all. Then, too, the white paper bill is greater than all the others combined, on many large papers running from \$100,000 to a quarter of a million dollars per annum.

Thorough Instructions for \$5

No money until you are satisfied that you can do the work.

No instruments required. An outfit of chemicals to continue this work will cost you \$3.

Call and see this beautiful work.

Will give you a free demonstration on same.

C. H. Schlueter,
JACKSON, - MISSOURI
Studio in Simms' Hall.

C. H. Schlueter,

photographer, a student of the Rembrand studio, which, as you all know, is the leading studio in St. Louis is able and ready to show and do some of his (Rembrand's) ideas in photographic work, as he is making use of the new mercury light, which enables him to take pictures without other light, either by day or night. Pictures are taken of all sizes in the latest styles, as you cannot get in every gallery over the country. To show you that our work will be first class, we will from April 26th to May 4th, without money in advance, make you a duplicate of yourself and if not satisfactory it will not cost you a cent. Also a special rate on stamp pictures—25 cents per dozen with three positions, and will give you a postal with your picture gratis. Call and see me and price my work and I think I can satisfy you.

An Ounce of Prevention

During the stress and exposure of the next six months nearly every human organism will occasionally need help to "Feel Well and Keep Well," and to thoroughly enjoy winter work and recreation.

Over-heated rooms, under-heated street cars, sloppy sidewalks, and draughty public places, in connection with too little outdoor exercise, and often too much eating, lead to colds, grip, indigestion, brain fog, and other upsets common to the winter season.

Orangeine, promptly applied, has made a wonderful record during the last fourteen years, of offset and prevention, and seems to supply just the help which Nature occasionally needs, to throw off incipient symptoms, which, unchecked, often lead to serious ailments; and to dispel that out-of-sorts feeling which render the system particularly susceptible to disease attack.

Under the simple directions of our booklet, regularly and systematically applied, the agencies of the Orangeine prescription seem to reach grip attacks most promptly and thoroughly, and, while correcting the cause, also dispel the usual debilitating after effects.

The most progressive and most prominent physicians of this country and Europe are now earnestly advocating the preventive principle which has made Orangeine so successful; and we cannot too strongly urge your thorough acquaintance with our prescription and its long record of human usefulness, in saving hours and days from worse than waste.

Yours very truly,
The Orangeine Chemical Co.
Chicago, Ill.
